

- IP69K for demanding wash environments
- Chemical-resistant acrylic body
- Versatile mounting for flexible installation.

Viper is a robust, cylindrical luminaire with an IP69K protection rating and stainless steel mounting brackets, specially designed for car washes and other demanding environments where high standards of durability, watertightness and reliability are required. The hard-wearing acrylic body also offers good resistance to many chemicals, making the luminaire well-suited to environments where regular and intensive cleaning takes place.

The luminaire is available in three different lengths (600, 1200 and 1500 mm). It has a colour temperature of 4000K and is equipped with DALI control, enabling flexible and energy-efficient light control.

The luminaire can be mounted on a wall or ceiling and is also suitable for pendant mounting with a separate accessory. It can also be suspended from a cable (max. cable Ø6 mm). Mounting fittings are supplied for easy installation. Connection is via screw terminals on the end cap, and the luminaire is fitted with a 2.5 mm^2 connection terminal.
