

- Dimmable ceiling light IP54 with up and down light
- Adjustable colour temperature
- Adjustable with several accessories

The ceiling light Isa is a versatile and slim luminaire with a diameter of 400 mm. With adjustable color temperature and output, the light can be easily adapted to different needs, and the smart combination of downlight and uplight provides a pleasant light distribution in the room. Isa is mounted directly on the wall or ceiling and is ideal for spaces such as corridors, stairwells, storage rooms, toilets, basements, changing rooms, and other common areas. The luminaire is also excellent as a suspended light in rooms with high ceilings—see accessories. Isa is available as on/off, with microwave sensor (RS), or as the app-controlled BTDA version with RS sensor for full lighting control. These settings are easily configured in the Exaktor Koolmesh app. As an accessory, a decorative ring with microprismatic film (7511176) is available, reducing glare and creating softer light. For flexible installation, several accessories are offered, such as a wire suspension kit up to 1.5 m (7511177), and a ceiling cup and arm for suspended mounting 0.3–0.6 m (7511178).
