

- Wall luminaire in a timeless design
- GU10 socket for replaceable light source
- Double-entry backplate with quick connector

Ivy S GU10 is a wall luminaire in a timeless design with light emission both upwards and downwards, or only downwards. The version with downward light emission can be mounted with the light upwards. The luminaire have a GU10 base, the recommended maximum power of the light source is 4.5W or less. Ivy S GU10 has high classification IP65 and IK06 and a smooth installation with quick contact between body and outer part. Available in black or aluminium grey textured paint. The Ivy series also includes LED variants in two sizes, S and M. The GU10 variant is only available in S.
