2026-11-21

- Next generation Naiad
- Low build and high performance
- Made in Sweden

Naiad G4 is the next generation low-profile all-round luminaire, developed to deliver powerful and flexible lighting in both demanding environments and interiors with requirements for efficiency and design. With a robust construction and smart upgrades, it is an obvious choice for industry, warehouses, garages but also for public spaces in a BRF. The IP44 rating ensures reliable protection in demanding environments, thanks to a new LED attachment, shadowing is minimised, resulting in a more even light distribution. The luminaire has a body in rolled sheet of metal and end caps in injection-moulded 2-component plastic, which means durability and a well thought-out design. To simplify installation and upgrading, Naiad G4 has a long bracket that makes it easy to replace previous Exaktor models, such as Naiad T5. The luminaire also has an end plate for smooth switching and strain relief. With adjustable output and a choice of fixed colour temperature of 3000K or 4000K, the light can be optimised for different needs. The same wide range of control options as Naiad G3 are available, including On/Off, DALI, RS, RS DIM, PIR and BTDA, where the PIR sensor is now also protected with IP44. Naiad G4 is available in three different sizes: 600, 1200 and 1500 mm, with several luminous flux options. The luminaire is manufactured in Sweden and therefore we have great flexibility to customise the luminaire as needed. With its smart design, flexible functionality and durable construction, Naiad G4 is the perfect choice for a bright and future-proof lighting solution.

Variations

E-number	Product name	Max. system power (W)	Lumen (lm)	Colour temperature (K)	Mått (LxWxH/D, mm)	Colour	IK class
