Image not found or type unknown

- Anti glare
- Several mounting options
- Made in Värnamo, Sweden

IP21

Balder DT is an interior light with pleasant general light and good lighting distribution. The luminaire is suitable for workplaces, shops, schools and more. Balder has a unique optic with a reflector for each light source, which provides a very effective glare angle. The luminaire is mounted directly on a fixed surface, on a bracket (7022517) or suspended with wire (7910347) as an accessory. Balder DT can also be angled with the accessory mounting angle kit (7920170). Balder DT is available in lengths of 1200 or 1500mm, color temperature 3000K or 4000K and in variants with and without over-coupling. On request, Balder can be ramp mounted and ordered with DALI. The luminaire is made in Sweden.
