

- Anti glare
- Made in Värnamo, Sweden

Galatea recessed fits perfectly in most interior environments such as receptions and corridors. The luminaire is advantageously used as general lighting as the glare protection creates a well-balanced light distribution. Thanks to the resilient suspension bracket, the luminaire can be mounted and dismantled without tools. The luminaire is white lacquered and adapted for recessing in concealed supports or modular ceilings for T-profiles and comes with a 3m halogen-free connection cable 5x0.75mm². Galatea is available in 3000K or 4000K and can be installed as DALI or pushdim 230V. The recessed version of Galatea also works perfectly as a complement to the pendant version in the same luminaire series. The luminaire is manufactured in Värnamo.
