

- Anti glare
- Made in Värnamo, Sweden

Galatea Pendant is a pendant luminaire that combines beautiful design with modern LED technology and high light quality. The luminaire is suitable as lighting in, for example, foyers, conference rooms or over the dining room table. Galatea Pendant works both as location lighting and as general lighting because the glare protection creates a well-balanced light distribution. The luminaire is available in black or white, 3000K or 4000K and can be installed as DALI or pushdim 230V. As standard, Galatea Pendant is delivered with a 5.0m textile cord with a connection cable that is equipped with a cable relief with a hook that can be adjusted along the cord. In the same luminaire series, there is also a recessed version which gives the opportunity to create a uniform appearance. The luminaire is manufactured in Värnamo.

Variations

E-number	Product name	Max. system power (W)	Colour temperature (K)	Mått (LxWxDxH/D, mm)	Colour	IP-class	Pendant length (mm)
7022919	GALATEA LED SVART DALI 840	33	4000 - 4100	-x-x500x139	Black	IP20	200 - 4500
