- Fulfills the requirements for D-marking
- Made in Värnamo, Sweden

Mamba Mini Agro is a durable luminaire that meets the requirements for D-marking and is well suited for demanding indoor environments or protected outdoor locations. Its wide light distribution provides uniform illumination and good visual comfort. For installations exposed to major temperature fluctuations or high humidity, please contact customer support to identify the best solution. The luminaire is available in 4000K, in two lengths (1200 and 1500 mm), and with on/off, DALI, RS, RS DIM or BTDA control. The sensor can also detect movement through glass and non-metallic walls. The RS version is best suited for ceiling heights up to 4 metres and is supplied with a 5-pole quick-connect terminal at both ends, two-phase through-wiring and one switched conductor. RS DIM provides a reassuring background light, for example at 10%, which increases to 100% when movement is detected. RS DIM luminaires can control up to five luminaires without RS DIM (DALI secondary luminaires). BTDA enables wireless control and grouping via Bluetooth. The luminaire is manufactured in Värnamo, Sweden.
