

- Robust with good glare control
- Complies with ball test DIN 57710-13 VDE 0710-13:1981-05
- Made in Värnamo, Sweden

Tage Sport is a Swedish-made open sports hall luminaire with a lot of light. The luminaire is equipped with industrial neon, which has a higher specification and is particularly suitable for tough environments with high demands. Tage Sport meets the requirements of the ball test standard DIN 57710-13 VDE 0710-13:1981-05. The luminaire is mounted on the ceiling (6mm groove) or on a cable with built-in cable bracket or on a pipe with accessory Pipe bracket 7910486 (unpainted) or 7910487 (white). Tage Sport is available in two lengths (1300 and 1600mm) and with two different beam angles, 60° or 90° and as a variant with on/off, DALI or BTDA. Tage Sport BTDA works as “stand alone” and has no possibility to forward DALI BUS with cable, but all communication is wireless. In order to protect the sensor, a ball cover is included, which is placed over the sensor in the end of the luminaire. Grouping and programming of the luminaires is done using Bluetooth / Bluetooth and the Exaktor Koolmesh app for iOS. The luminaire is available in zinc-coated sheet steel or white, in 4000K and with LEDs in one or two rows (2R). Connection is made at the ends without having to dismantle the optics or reflector, always with an override. On/Off and BTDA have 5G2. 5mm2, DALI has 5G2. 5mm2 + 2x1. 5mm2 for DALI. On request, Tage is available with a different luminous flux, CRI90, other light color, painted in any RAL color or with a quick switch. The luminaire is manufactured in Värnamo.
