

- Timeless design
- Steplessly adjustable c-c mounting
- Made in Värnamo, Sweden

With its timeless design, Telesto Pendant blends into today's modern environments. The luminaire has a clean design language with straight lines, which gives freedom to work creatively with the lighting design. Grooves on the sides enable infinitely adjustable c-c over the entire length of the luminaire. The brackets are simple in their design and they embrace the luminaire in a discreet way.

The luminaire is available in 4000K, in one length (1610mm), with prismatic glare control for Telesto Prisma and with opal glare control for Telesto.

The DE luminaire is equipped with two pull cords for separate regulation of up and down light. Supplied as standard with a 2.5m cord holder.

The luminaire is manufactured in Värnamo.
